ITSM Implementation Screenshots

Our Approach

- Stage 1 - Validated Requirements
- Stage 2 - Build out the requirements using an Agile process
- Stage 3 - Go-live of the Internal ITSM process
- Stage 4 - On-board their 1st Customer (this happened post go-live)

Key Results

- Aqura now have a solution that is able to cater both for their internal ITSM process as well as external customer requirements.

Additional Benefits

- Due to the success of the phase 1 ITSM implementation, Enable has been invited to speak with Aqura Operations manager to better understand their business challenges as Aqura goes into a growth phase.
- Possible future phases:
 - CSM
 - GRC
 - ITBM
